PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience building full-stack web applications and system-monitoring tools. Skilled in C, C++, and Python with a strong foundation in problem-solving. Seeking an internship/entry-level role to contribute to real-world software products.

EDUCATION

SRM UNIVERSITY AP

B.Tech. in Computer Science and Engineering

- Cumulative GPA: 7.0/10 (through 4th semester)

Aug 2024 – May 2028

[Amaravathi, AP, India]

TECHNICAL SKILLS

Programming Languages: C • C++ • Python

Web Technologies: HTML, CSS, JavaScript, React

Databases: MySQL, MongoDB

Frameworks: Flask, Django, Node.js

Tools: Git, GitHub, VS Code

Soft Skills: Communication • Teamwork

EXPERIENCE

SmartBridge Indonesia

Artificial Intelligence and Machine Learning Intern

May 2026 – July 2026

[Remote]

- Built a machine learning model using Python to predict loan eligibility for applicants based on income, credit history, and employment details, integrated into a Django-based web application.
- Preprocessed and cleaned applicant datasets, engineering relevant features to improve model prediction accuracy.
- Deployed the application on IBM Cloud, enabling users to input applicant details and receive real-time loan approval predictions through a web interface.

PROJECTS

Automated Student Attendance Monitoring System | [Tech Stack – Python, OpenCV]

- Developed an automated system to track and record student attendance using digital inputs.
- Implemented features to reduce manual errors and improve accuracy of attendance data.
- Designed a user-friendly interface for easy monitoring and report generation.
- 🌐 GitHub Repository

Time Table Management System | [Tech Stack – HTML, CSS, JavaScript, MySQL]

- Developed a full-stack web application to manage class schedules, subject allocations, and faculty assignments efficiently.
- Built a database-driven system to generate, store, and update timetable information accurately.
- Implemented user-friendly features for timetable creation, schedule tracking, and streamlined academic planning.
- 🌐 GitHub Repository

Inventory and Order Management System | [Tech Stack – Python, Flask, MySQL]

- Developed a full-stack web application to manage inventory and process customer orders efficiently.
- Implemented features for product tracking, order placement, and real-time stock updates.
- Integrated user-friendly interfaces and backend functionalities to improve business operations and streamline workflow.
- 🌐 GitHub Repository

CERTIFICATIONS

- MongoDB Certified Associate Developer – MongoDB, 2026
- AI and ML engineer – SmartBridge Indonesia, 2026
- CREDLY BADGES

LANGUAGES

- English (Fluent) • Telugu (Native) • Hindi (Conversational)

INTERESTS

- AI Prompting LLM Exploration • Open Source • Gaming
